TOWN HALL WHEELING AND DEALING

THE usually sedate Town Hall corridors were turned into a temporary racetrack last week when Lord Mayor **Michael Harbison** took this battery powered scooter for a test drive. Under the watchful eye of importer **Peter Karidis**, the Lord Mayor zipped through the chamber and out to the foyer with unbridled enthusiasm. Stunned members of the public jumped out of the way. The scooter can go 20km/h and costs about \$8500. Mr Karidis said they were intended to be used by people such as security guards or sticker-lickers.
